Martin County, FL – The Florida Department of Health in Martin County is hosting a free vaccination clinic on Saturday, May 14 from 9:00 am to 12:00 pm, 3441 SE Willoughby Blvd., Stuart. The Tdap vaccine, which provides protection against tetanus, diphtheria and pertussis and is required for 7th grade entry, will be provided.

Vaccines to protect against meningitis and HPV (human papillomavirus) will also be available. The HPV vaccine, recommended for adolescents, is provided in a series of 3 shots over 6 months and protects against cervical and throat cancers.

No appointment is needed. Vaccine supply is limited and will be provided on a first come, first served basis. A parent or legal guardian must be present for the child to receive a vaccination.

Florida statute requires students who are entering the 7th grade to show proof of the Tdap booster vaccination on the #680 form. If the student already received the Tdap booster, parents should deliver the #680 form to their child's school before August 15th.

Additional information on immunizations is available at www.MartinCountyHealth.com
