

Think Zika

Florida Department of Health • FloridaHealth.gov

1. IDENTIFY

Ask the patient about travel to areas with Zika virus activity.

Ask if the patient or fellow-travelers became ill while traveling or during the two weeks after return, and reported two of the following:

- FEVER
- RASH
- JOINT PAIN
- CONJUNCTIVITIS

2. TEST

Order an ultrasound for a pregnant woman who has traveled during pregnancy. Order Zika virus testing if microcephaly or intracranial calcifications are present in the fetus.

For all travelers with symptoms, contact your local health office to request Zika virus testing.

Test for dengue and chikungunya if the patient or fellow-travelers reported fever.

3. REPORT

Report any suspect Zika, dengue, or chikungunya cases to your local health office within one business day to ensure appropriate confirmatory testing and mosquito control.
