DOH-MARTIN URGES RESIDENTS TO PROTECT THEMSELVES FROM MOSQUITO AND TICK-BORNE ILLNESSES

Contact:

Renay Rouse Renay.Rouse@FLHealth.gov 772-631-6008

Martin County, FL – The Florida Department of Health in Martin County (DOH-Martin) is urging all residents and visitors, especially those that are spending time outdoors, to protect themselves from mosquito and tick bites this summer season. While most tick and mosquito bites are only an annoyance, sometimes these bites can be dangerous. Preventing bites reduces the risk of a person getting infected with a [mosquito-](#) or [tick-borne disease](#).

“With the extensive amount of rainfall in our area mosquito breeding is expected, so it’s very important that all residents take steps to protect themselves from being bitten.” said Carol Ann Vitani, Health Officer for the Florida Department of Health in Martin County.

Mosquito Bite Prevention

Using the right insect repellent and other preventive actions can discourage mosquitoes from landing on you. Follow these **Drain and Cover** tips to help prevent mosquito bites.

Drain water from outside areas to reduce the number of places mosquitoes can lay their eggs and breed.

- Drain water from garbage cans, house gutters, buckets, pool covers, coolers, toys, flowerpots or any other containers where sprinkler or rainwater has collected.
- Discard old tires, bottles, pots, broken appliances and other items not being used.
- Empty and clean birdbaths and pets’ water bowls at least twice a week.
- Protect boats and vehicles from rain with tarps that do not accumulate water.
- Maintain swimming pools in good condition and chlorinated. Empty plastic swimming pools when not in use.

Cover with protective clothing while outdoors and keep doors and windows closed to prevent mosquitoes from going indoors.

- Wear shoes, socks, long pants and long sleeves while outside when and where mosquitoes are most prevalent to discourage mosquitoes from biting.
- Apply insect repellent that contains DEET (10-30%), picaridin, oil of lemon eucalyptus, para-menthane 3,8-diol, 2-undecanone or IR3535.
- Treat clothing and gear with products containing 0.5%. Do not apply permethrin directly to skin. Some sports clothing and gear come pretreated with permethrin.

- Use mosquito netting to protect children younger than 2 months old.
- Check and repair screens on doors and windows. Keep them closed and use air conditioning when possible.
- Make sure window screens are in good repair to reduce the chance of mosquitoes indoors.

Tick Bite Prevention

Ticks are commonly found on the tips of grasses and shrubs and climb aboard humans as they walk by. Follow these steps to help prevent tick bites.

- Wear long-sleeved shirts, pants, boots or sturdy shoes, and a head covering. Ticks will be more visible if clothing is light-colored.
- Apply insect repellent that contains DEET (10-30%), picaridin, oil of lemon eucalyptus, para-menthane 3,8-diol, 2-undecanone or IR3535.
- Treat clothing and gear with products containing 0.5% permethrin. Do not apply permethrin directly to skin. Some sports clothing and gear come pretreated with permethrin.
- Walk in the center of trails so grass, shrubs, and weeds do not brush against you.
- Check for and [remove ticks from your clothing, body, hair](#), and pets when you have been outside.
- Washing clothing in hot water or tumbling dry clothing in the dryer for at least 10 minutes set at high heat will kill ticks.
- Shower soon after being in tick habitat.
- If a tick is found on the skin it is important to [safely remove the tick as soon as possible](#).
- Talk to your veterinarian about tick prevention products [for your pets](#).
- Keep grass, shrubs and trees close to your residence trimmed.

Tips on Using Repellent

- For both mosquitoes and ticks, use insect repellent approved by the [Environmental Protection Agency \(EPA\)](#) on exposed skin and clothing. EPA's helpful [search tool](#) can help you find the product that best suits your needs.
- Follow instructions on the product label, especially if you're applying it to children.
- Apply insect repellent to exposed skin, or onto clothing, but not under clothing.
- Always follow instructions when applying insect repellent to children and do not use repellents with DEET on babies younger than 2 months or oil of lemon eucalyptus or para-menthane 3,8-diol on children under 3 years old.
- Avoid applying repellents to the hands of children. Adults should apply repellent first to their own hands and then transfer it to the child's skin and clothing.
- When using with sunscreen, apply sunscreen first and then repellent.

Visit the [Centers for Disease Control and Prevention website](#) for more information on the safe use of repellent.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.
